## Contents Volume 123, 1999

### *Research Papers*

|   |     |
|---|-----|
| Late Miocene Mediterranean desiccation: topography and significance of the 'Salinity Crisis' erosion surface on-land in southeast Spain<br>R. Riding, J.C. Braga and J.M. Martín  | 1   |
| Timing and genesis of early marine caymanites in the hydrothermal palaeokarst system of Buda Hills, Hungary<br>L. Korpás, M. Lantos and A. Nagymarosy   | 9   |
| Sedimentology of the Cretaceous Maha Sarakham evaporites in the Khorat Plateau of northeastern Thailand<br>M. El Tabakh, C. Utha-Aroon and B.C. Schreiber   | 31  |
| Lower Ordovician iron ooids and associated oolitic clays in Russia and Estonia: a clue to the origin of iron oolites?<br>U. Sturesson, A. Dronov and T. Saadre  | 63  |
| Progressive changes in sedimentary facies and stratal patterns along the strike-slip margin, northeastern Jinan Basin (Cretaceous), southwest Korea: implications for differential subsidence<br>S.H. Lee and S.K. Chough | 81  |
| Facies analysis and sequence stratigraphy of a Miocene warm-temperate carbonate ramp, Montagna della Maiella, Italy<br>A. Vecsei and D.G.K. Sanders   | 103 |
| Pore water evolution in sandstones of the Groundhog Coalfield, northern Bowser Basin, British Columbia<br>H.O. Cookenboo and R.M. Bustin  | 129 |

### *Discussion*

|   |     |
|---|-----|
| Low limit of Mn <sup>2+</sup> -activated cathodoluminescence in calcite: state of the art — comment<br>F. Bruhn and P. Bruckschen               | 147 |
| Low limit of Mn <sup>2+</sup> -activated cathodoluminescence of calcite: state of the art — reply<br>D. Habermann, R.D. Neuser and D.K. Richter | 149 |
| Kinematic indicators in fault gouge: tectonic analogy for soft-bedded ice sheets — comment<br>J. Shaw   | 153 |
| Kinematic indicators in fault gouge: tectonic analog for soft-bedded ice sheets — reply<br>N. Eyles and J.I. Boyce                              | 157 |

### *Expressed*

|  |     |
|--|-----|
| Hummocky moraine: sedimentary record of stagnant Laurentide Ice Sheet lobes resting on soft beds<br>N. Eyles, J.I. Boyce and R.W. Barendregt | 163 |
| Erosional remnants and pockets evolving from biotic–physical interactions in a Recent lower supratidal environment<br>N. Noffke              | 175 |

### *Research papers*

|  |     |
|--|-----|
| Facies architecture and sequence stratigraphy in glacially influenced basins: basic problems and water-level/glacier input-point controls (with an example from the Quaternary of Ontario, Canada)<br>M.E. Brookfield and I.P. Martini | 183 |
|--|-----|

|   |     |
|---|-----|
| Sedimentology of gravelly Lake Lahontan highstand shoreline deposits, Churchill Butte, Nevada, USA<br>T.C. Blair . . . . .  | 199 |
| Sedimentological characteristics and morphology of the aeolian sand dunes in the eastern part of the UAE, a case study from Ar Rub' Al Khali<br>M.I. El-Sayed . . . . . | 219 |
| A paleo-Brahmaputra? Subsurface lithofacies analysis of Miocene deltaic sediments in the Himalayan–Bengal system, Bangladesh<br>A. Uddin and N. Lundberg . . . . .      | 239 |
| The origin of sulphur in gypsum and dissolved sulphate in the Central Namib Desert, Namibia<br>F.D. Eckardt and B. Spiro . . . . .                                      | 255 |
| <i>Author Index Volume 123, 1999</i> . . . . .  | 275 |
